

PROJECTS AND VISIONS

CT Market overview Industrial Parks in Europe CHEMIE TECHNIK regularly publishes overviews of industrial Parks in Europe. Our latest overview nearly 60 parks focussing on the chemical, pharmaceutical, and biotech industries.

Pharmaserv Owners Plan to Operate More Sites

Infrareal The six owners of Marburg-based site service provider Pharmaserv have announced their intention to acquire more industrial parks in Germany. The Management-Holding Infrareal GmbH, Marburg, was founded specifically for this purpose in August 2008. It is to manage and control site operating companies. Infrareal AG, Zürich, is to aid further development of the group. "Infrareal will thus become the first group of site operating companies which is independent of special interests such as energy supply, waste management, facility management or engineering", was how Markus Schwerzmann, one of the six owners, outlined the concept. Core business of this "integrated site management"

The six owners of Marburg-based site service provider Pharmaserv have announced their intention to acquire more industrial parks in Germany.

model is holistic site management. Infrareal is to establish a permanent place as leading site operating group in the constantly moving industrial park market

with Pharmaserv as reference. The site operators see potential for takeovers primarily among the 30 or so multi-user sites in Germany. www.infrareal.de
